

Smart-Leaf QUICK SET-UP GUIDE

For detailed instructions, refer to the User Manual at www.Smart-Leaf.com.

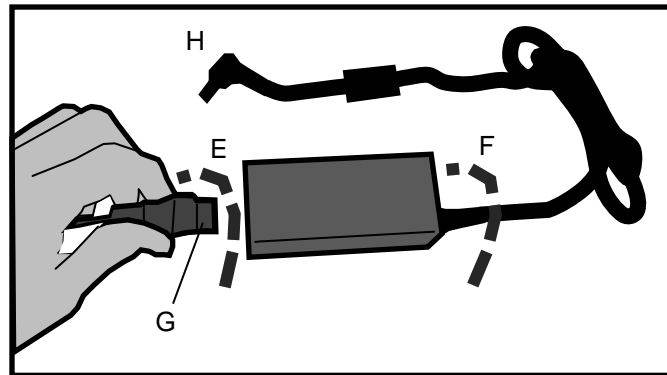

STEP 1: Lay Smart-Leaf (screen down) on a soft surface. With a gentle outward force, verify that tabs **A** and **B** are positioned outward to set the keyboard into wall-mounted mode. A slight opening of the keyboard may ease the sliding of tabs **A** and **B**.

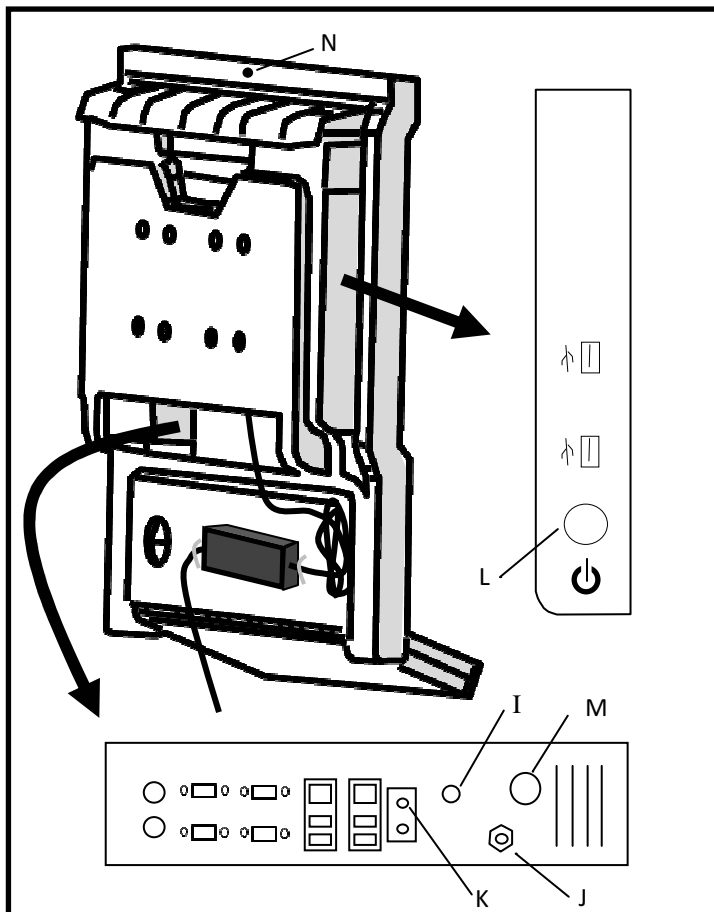

STEP 2: For future reference, write down Smart-Leaf serial number and Windows license number located at **C**.

STEP 3: Attach an appropriate mounting bracket (not included with Smart-Leaf) to the mounting holes at **D**. Use four mounting screws with the size of M4-0.7x6.

STEP 4: Note the power cord holders are located at **E** and **F**.

STEP 5: Route power cord end **G** through cord holder **E**, then route power cord end **H** through cord holder **F**.

STEP 6: Mount Smart-Leaf to a wall in accordance with proper procedures; professional installation service is recommended.

STEP 7: Insert power cord into port **I**, screw TV cable into port **J** (if cable TV is desired), and insert 3.5 mm audio cable into port **K** (if external speakers are desired).

STEP 8: Plug the power cord into an appropriate power supply.

STEP 9: Push power button **L** for Smart-Leaf Y or power button **M** for Smart-Leaf Z.

STEP 10: Rotate webcam adjuster **N** to adjust shooting angle.

To open the keyboard:

STEP 11: Push the latch inward.

STEP 12: Then, firmly pull the latch outward.
